
COCONUT SHELL CHARCOAL

PRODUCT CODE – PTS/CSC/001

Overview

Coconut Shell Charcoal is an important product obtained from coconut shells.

Coconut Shell Charcoal has many uses but is primarily used in the manufacture of activated carbon. Charcoal Briquettes are made from natural Coconut Shell Charcoal and an all natural food grade binder. Environmentally-friendly Briquettes Charcoal is ideal for all your BBQ and cooking purposes. The briquettes are also used for Shisha smoking.
